

Pre-assembled, fully engineered systems  
for protecting your world.

**RDI Enclosures** provides custom-built, fully-assembled enclosures that can be engineered to fit your exact specifications and equipment. Our enclosures are built to our exacting quality control standards, to meet your requirements.

Strong. Tested. Delivered.

**RDI Enclosures** are strong, reliable and built to stand the test of time. Built to last by an organization dedicated to building quality products for our customers. Your enclosure is fully assembled in our factory so we can provide you a high quality, complete enclosure solution saving you time, money, management and logistics.

As part of The RDI Group, RDI Enclosures is able to offer more products and services. The RDI Group businesses include the design and manufacture of precision engineered equipment for the asphalt roofing, construction and metal coil processing industries. The machinery and manufacturing solutions designed, built and commissioned by us have been helping customers improve productivity and profits since the early 1900s.

**RDI Enclosures** is your one stop shop for your enclosure needs. While we can certainly provide “enclosure only” solutions, we are also a fully integrated enclosure manufacturer with the following capabilities:

- Engineering Services
- Electrical, Mechanical & Piping Installation
- Site Development
- On-site Installation Services
- System Testing

**RDI Enclosures** provide many different construction options for a variety of applications. Our designs can be found in a wide range of industries:

- **Power**
  - Pump Houses
  - Blower Housing
  - Compressor
- **Utilities**
  - Meters

**RDI Enclosures** are custom built and can be made using a variety of materials such as:

- Aluminum
- Steel
- Fiberglass
- Brick
- Aggregate

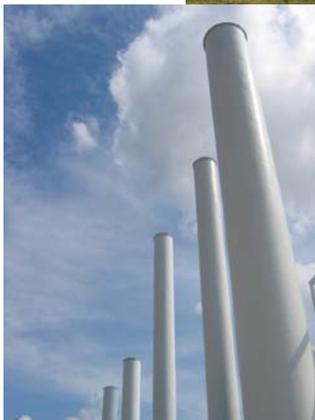

***RDI Enclosures is your complete source for all of your enclosure needs***

**Our Mission** is to provide our customers with shelters and enclosures that meet demanding requirements for quality, integrity and value. We start by understanding our customer's requirements, and based on our decades of experience and designs we offer a solution that will best meet those requirements. Our design and manufacturing process enables us to offer a superb combination of quality, performance and overall value.

We can also offer our customers complete installation of the equipment and systems that our shelters will protect. Our 120,000 square foot manufacturing facility and over-all organization has extensive electrical and mechanical capabilities in addition to building the finest shelters available. Customers can plan their projects to include complete and fully tested enclosures, shipping direct from our factory.

We have experience providing shelters to a wide range of industries, including telecommunications, wind turbines, power generation and a range of industrial and process applications.
